Dear SL Shridharji;

This is to invite you to the O&M Conference "Indian Power Stations-2018" being organized by NTPC Limited from 13th to 15th February, 2018 at Delhi. NTPC has been organizing the International O&M Conference, every year to commemorate the anniversary of commissioning of the first unit of NTPC at Singrauli, on 13th February, 1982. NTPC has grown since then to 51000+ MW company, at over 45 locations across India, which includes Thermal, Gas, Hydro & Renewables. Each year, the conference theme is selected, reflecting the areas and subjects of contemporary relevance. Indian Government has put the Power Sector on a high growth trajectory while unleashing the renewable option. We hope this year's theme "**Technological challenges – risks and opportunities in power generation**" will bring forward innovative and sustainable Power Generation opportunities mitigating all the technological challenges being faced.

The conference provides an opportunity for power plant professionals, researchers, manufacturers, service providers and engineers to share O&M experiences, information on emerging technologies and best industry practices. Equipment manufacturers, Power Plant Builders and Service Providers, both from India and abroad, have been participating in this event every year in addition to the power professionals from the Power Generation Industry. IPS-2017 also received an overwhelming response from delegates from India as well as from other countries around the world.

The inaugural program of the Conference shall commence at **0930 hrs. on 13th February, 2018 (Tuesday), at Manekshaw Centre, New Delhi**. The inauguration shall be followed by technical sessions, covering various topics related to this year's Conference theme at the Manekshaw Centre, and on the 14th and 15th February, 2018, at Power Management Institute, Noida. The complete information is available at our website "indianpowerstations.org" via link <http://210.212.126.93:8000>. I am sure that IPS-2018 shall provide an exciting forum for knowledge sharing among technology Experts and power professionals.
